INTRODUCTION

THIS catalogue is intended to illustrate and describe cutlery made by Hyde Manufacturing Company. Special care has been taken in the arrangement of cuts so that dealers can quickly obtain information in presenting items to prospective customers. Listings have been made under alphabetical headings and with index will enable any style wanted to be easily located.

The line includes products marketed under the trade names I. P. HYDE,  and  which are all registered in U. S. Patent Office.

Tool Knives used by mechanics are branded I. P. HYDE or  and include:

Knives and Blades for cutting Leather and Rubber.

Blade Handles

Cloth, Corset, Collar, Cuff Shirt Cutters Blades and Handles.

Clam, Cigar, Budding, Oyster, Pruning Knives. Circular Knives.

Paper Hangers, Bookbinders.

Linoleum and Oil Cloth Knives.

Banana, Butcher, Baker, Furrier, Feather, Glass Worker, Sloyd Knives.

Broom Knives, Needles, and Pounders.

Putty Knives, and Scrapers.

Lineman's, Postal, Roofers, Fish Splitting Knives, etc.

In addition to the foregoing, this catalogue contains descriptions and illustrations of kitchen and household cutlery in both Stainless and Carbon steel known under the registered trade name .

Every Hyde product has a background of over fifty years manufacturing experience. This business was established originally for the manufacture of Extension Blades and Shoe Knives used by shoe repairers and cutters of leather. The success of these products has brought about additional lines until today the company has the equipment for producing a complete line of cutlery with a modern plant specializing in the manufacture of quality cutting tools for the trades.

One of the successes of Hyde Cutlery is the policy of individual hardening of Knives and Blades. This has enabled us to produce and maintain our Standard for the past half century.

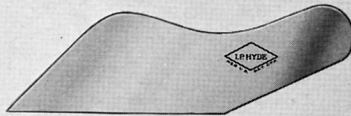

A separate Price List is issued covering all items in this catalogue together with Discounts and Terms.

Household Cutlery

Stainless and Carbon Steel

HYC is the brand registered in U. S. Patent Office which appears exclusively on all household cutlery made by Hyde Manufacturing Company. Under this HYC trade-mark a satisfactory article is guaranteed.

The only real up-to-date cutlery which is used in the household must be made of stainless steel. This new steel is a recent development; and it has, when properly hardened and tempered, many wonderful qualities.

HYC Stainless steel cutlery will not rust, stain, or tarnish from acids contained in fruits, meats, vegetables, or discolor from general use. Constant scouring and polishing is now eliminated because HYC stainless steel requires only soap and water to be kept bright and clean. All blades are ground to a cutting edge and will stay sharp longer than ordinary cutlery. The housekeeper will take pride in having HYC stainless steel cutlery in her modern kitchen.

A new shaped handle is shown to further aid the housewife. This handle is designed to fit the hand perfectly and is an exclusive feature of HYC cutlery. The finish of these handles is usually black rubberoid enamel baked on. Under extreme conditions this fine finish will prove entirely satisfactory, and will stand hot water without injurious effect. However, handles should not be allowed to soak in soapy or alkaline water. Other items are shown with Cocobolo, Flat Sided Black, and Burnt Wood Handles. White enamel finish can also be furnished.

A complete line of HYC carbon steel cutlery is made and can be supplied to those who desire household cutlery in carbon steel. All HYC carbon steel cutlery carries our regular guarantee for quality and workmanship.

Announcement

THE Hyde Manufacturing Company has recently purchased the goodwill, machinery, tools and trade marks of the Theodore Harrington Company, Southbridge, Mass. The Theodore Harrington Company was established by Theodore Harrington in 1848 and has been in successful operation for over seventy-five years.

In the future the trade marks Theodore Harrington and Southbridge Cutlery Company can be furnished in the various items shown in this catalogue.
